GreatShield EDR – Product Overview

Built for mid-sized financial institutions without large security teams.

Key Features
- Continuous endpoint monitoring for Windows, macOS, and Linux workstations and servers
- Ransomware rollback: restores encrypted files to their pre-attack state
- Audit-ready compliance reports mapped to NCUA and FFIEC guidance, exportable as PDF
- One-click device isolation to contain threats
- Managed alert triage: GreatShield analysts review alerts 24/7 and escalate only confirmed threats

Deployment
- Cloud-managed; no on-premises servers required
- Lightweight agent deploys through existing software tools

Pricing
- Per-endpoint annual subscription
